OBJECTIVE

Final-year B.Tech (AI/ML) student with a solid foundation in full stack development, DSA, and OOPs. I've shipped real-world authentication systems, finance trackers, and AI-integrated applications and I bring the same problem-solving mindset to everything I build. Actively seeking backend, full stack, or AI development internship to grow alongside a strong engineering team.

PROJECTS

PRISM – AI-POWERED MISINFORMATION & CREDIBILITY ANALYZER

June, 2026

- Architected the backend with Node.js/Express, designing a REST API pipeline that integrates Gemini API for real-time NLP-driven claim extraction, bias detection, and credibility scoring across news articles and social media content to analyze news blogs for credibility, bias, emotional manipulation, and unsupported claims.
- Built a multi-label text classification pipeline using structured prompt engineering. It's an explainable AI reporting system that extracts key claims, generates credibility scores, and provides transparent reasoning output through interactive dashboards and historical analysis tracking in MongoDB.

AUTHIFY – AUTHENTICATION SYSTEM | [Live Demo](#)

April, 2026

- Architected a production-grade auth platform end-to-end using React + Vite, Context API, Node.js/Express, and MongoDB with JWT authentication, Google OAuth, email verification, password reset, secure session management, integrated Cloudinary and input validation across all endpoints.
- Engineered JWT refresh-token rotation with Axios interceptor queuing, protected routes, and reusable middleware all within a scalable role-based access control.

XPENSE MANAGER – PERSONAL FINANCE TRACKER | [Live Demo](#)

September, 2025

- Built a full-stack expense tracker with React frontend, Node.js/Express REST API, and MongoDB — processing 50–100 real transaction entries.
- Implemented features such as transaction tracking and manual card entry with end-to-end data flow from frontend components to backend API to database, analytical charts, receipts/bills upload, dark/light mode and mobile-first responsive design.
